

STAND WITH **MAINE**

Money in Maine Politics Fact Sheet

Maine just experienced the most expensive election in our history, with over \$200 million spent to influence the outcome of our Senate race. To protect the right of Maine voters to make our own decisions for our state and our way of life, we must stand together to end the flood of money drowning out our voices in our own elections.

Maine has been a leader in the national movement for the next amendment to the U.S. Constitution to ensure political representation for all Americans, not only elite special interests. Now is the time for Mainers to use our votes to ensure whomever we elect stands with us, not outside interests, to advance this critical reform across the finish line.
